4. First-aid measures

4.1 Description of necessary first-aid measures

Following inhalation

Move the victim into fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration and consult a doctor immediately. Do not use mouth to mouth resuscitation if the victim ingested or inhaled the chemical.

Following eye contact

Rinse with pure water for at least 15 minutes. Consult a doctor.

Following ingestion

Rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Call a doctor or Poison Control Center immediately.

Test Item

Sunscreen cosmetics sun protection factor (SPF) test

Test Method

ISO 24444: 2019 Cosmetics-Sun protection test methods-In vivo determination of the sun protection factor (SPF)

SPF value test

- a. 24 hours to 7 days before the test, test the minimal erythema dose (MED) of the subjects' back under UV irradiation. Adjust the amount of UV irradiation for the sample test according to the predicted results.
- b. The amount of test product and reference sunscreen formulation applied to the skin after spreading shall be $(2.00 \pm 0.05) \text{ mg/cm}^2$. Select 3 areas ($6\text{cm} \times 7\text{cm} = 42\text{cm}^2$) in the subjects' back. The test sample and the standard weighed in a syringe are applied to the test site using a clean finger with or without finger cot. Evenness of each application was checked under a Wood's Lamp. Then let the subjects wait for 15-30 minutes.
- c. The UV exposures for the protected test sites were calculated from previously determined MED and the geometric progression of the UV dose was 1.15.
- d. Carry out UV radiation of three areas: blank control area, standard control area and test sample area. After 20 ± 4 hours, record the MED value of three areas.
- e. The SPF calculation formula is as follows:

$$SPFi = \frac{\text{MED (Protected skin)}}{\text{MED (Unprotected skin)}}$$

Calculated the mean of all subjects' SPF value and take its integral part as the SPF value.

Material and Subject

1. Testing sample: Cosmetic final product
2. Reference sunscreen formulation:
P2 (SPF16.1 $\pm$ 2.4) and P5 (SPF30.6 $\pm$ 6.9), Solar Light Company, Inc

3. Subjects:
Healthy volunteers aged from 18 and 60 were recruited for this study. Test subjects included in the SPF test shall be only phototypes I, II or III according to Fitzpatrick or shall have an ITA° value > 28° by colorimetric methods and be untanned on the test area.
SPF value test: 10 in total (9 females, 1 males), aged from 24 to 59, meet the voluntary inclusion criteria.
4. Equipment:
